

# The Next Century in Profile Machining

*The fully automatic Profile Machining Center from Handtmann*

- Fully automatic machining center with integrated automatic material handling
- Complete machining from the bar stock from all six sides
- Innovative clamping technology, independent from profile dimension
- Continuous milling operations along the total part length
- Integrated 3D sawing, sawblade diameter up to 500 mm
- Latest digital control and drive technology from SIEMENS

Enter a new age of high speed profile machining with the fully automatic machining center PBZ® DL from Handtmann.

#### Applications

- Aerospace Industry
- Metall Construction
- Automotive Industry
- General Profile machining
